Introduction

A real cool handy app to manage your everyday check lists efficiently. All your lists-shopping, travel, grocery, to-do, DVDs, classes and much more! Why buy separate programs when checklist does it all?

Description

Checklist Pro is a advanced and powerful application to help you manage day to day activities and tasks. Create any number of category and list items quickly and easily with the intuitive user interface.

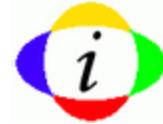

Checklist Pro contains all the tools you need to make life and business a lot easier. Checklist is designed to allow you to keep one dimensional lists on any subject and then check off the items with priority status. Three level of priority is given High, Medium and Low with three different colors. Some ideas for its use are: collectibles, book lists, video lists, CD lists, grocery lists, guest lists, to-do lists, etc....

Any number of category and items can be added with user's choice. Notes are provided separately, which gives more storage for the additional information.

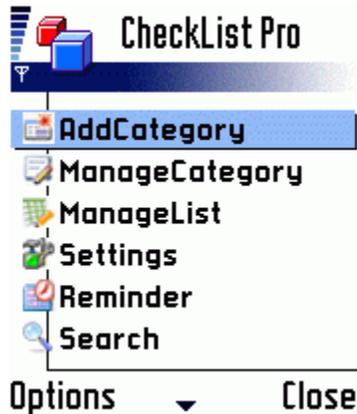

This powerful checklist pro will keep tracks more than one item at a time, in fact as many as you like.

Professionally and newly designed user-interface that speeds up Data Entry and Easy Viewing.

Infodev Technologies, Inc.

Working

Select the first menu icon **to create** a new category for the checklist. Once the category is created, add the new item for the checklist.

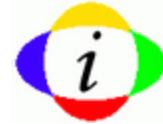

Input all the item details in the add module and select the priority for the list. Select the second menu icon to manage the category list and select the item **to retrieve** the details.

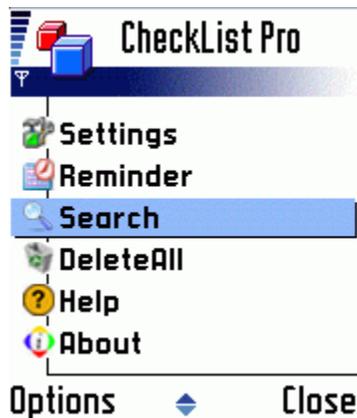

There is provision for the edit/delete menu in the entire module list.

In the menu, select the edit menu to modify the checklist

Select the delete menu **to delete** the particular record in the list.

Select the manage list to retrieve the entire list item for the category. User can check or uncheck the item in this module.

Select the search by name menu to view the item details of the particular entry.

Select the delete All button to erase the complete database of Checklist Pro.

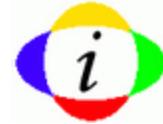

Select the help button for brief Help about Checklist Pro.

Key Features

Checklist Pro features include:-

One of the following operating systems on your Desktop Computer:

MS Windows 95/98/Me, MS Windows 2000/2003, MS Windows XP.

Java Enabled Device:

Device: Java Enabled Mobile Phone.

MIDlet-Info-URL: www.infodevtech.com

MIDlet-Jar-Size: 51239

MIDlet-Jar-URL: Checklist Pro.jar

MIDlet-Name: Checklist Pro

MIDlet-Vendor: Infodev Technologies, Inc.

MIDlet-Version: 2.0

MicroEdition-Configuration: CLDC-1.0

MicroEdition-Profile: MIDP-2.0

Memory: 112 KBytes of free memory space.

PC Synchronization software with cradle- provided by manufacturer.

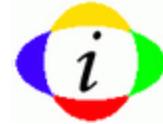

TO INSTALL / UNINSTALL:

Installation Instructions

Install the CheckList Pro.jar / CheckList Pro.jad into the mobile device using the PC sync software.

Uninstallation / De-Installation:

Remove the Checklist Pro.jar / Checklist Pro.jad from the mobile device using remove/uninstall option.

GENERAL ISSUES

- If the PC synchronization is failed, Please connect the cradle properly and try again.
- If a network card is inserted in the CF slot and the device is on battery power, the device will not shut off automatically after you, a reminder, or an alarm powers the device on. The device will remain on until it runs out of power, regardless of whether the network card is actually in use or not.

FAQs

1. The downloaded program is not working properly.
Please re-download the program using your Order/Purchase ID.
2. Program Setup is not running properly.
Please uninstall the program and reinstall it.
3. Program installed properly, but unable to open.
Please check the program, available in the device.
